# Nano

*smallest footprint module*

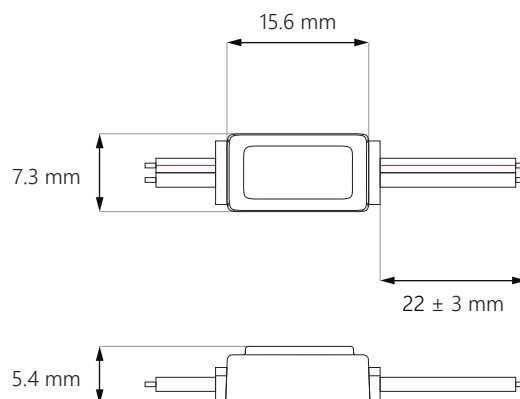

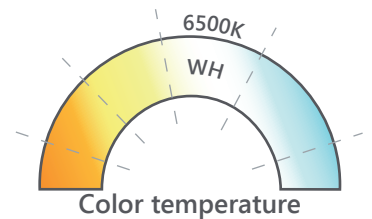

## Features

- selected SMD diodes with enhanced brightness
- small size
- aluminum PCB for superb heat dissipation
- chain of 50 pcs
- assembly with **3M** tape

## Application

min. 3 cm depth channel letters

# Pico

*even for 2 cm depth*

## Features

- selected SMD diode with enhanced brightness
- professional 160° lens for excellent light scattering
- small size
- chain of 50 pieces
- assembly with **3M** tape

## Application

min. 2 cm depth channel letters

0.36W

## Application

lightboxes, channel letters, neon signs,  
POS system

# Opticor<sup>1</sup>

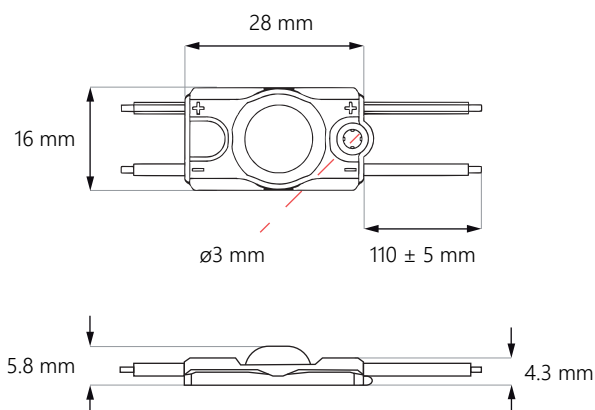

*best for 5-10 cm*

## Features

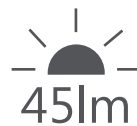

- **selected LEDs** — high-efficiency diodes in a housing with heat sink, LM-80's compatible, binned for luminous flux, color temperature / wavelength and forward voltage
- **bigger LED chip** — more brightness, greater surface area = longer lifespan
- **professional lens** — 160° bat-wing lens provide greater light scattering, reduce density of the modules in application = reduced cost, and significantly improved illumination uniformity
- **stabilizer** — constant current integrated circuit
- **aluminum PCB** — superb heat dissipation
- **chain of 50 pieces**
- **auxiliary assembly with 3M tape**

## Application

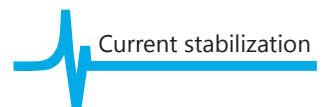

from 5 cm depth small lightboxes and channel letters

- 25** Elypso 1.5W
- 26** Elypso 3W
- 27** Elypso 4.5W

# Elypso Board 21

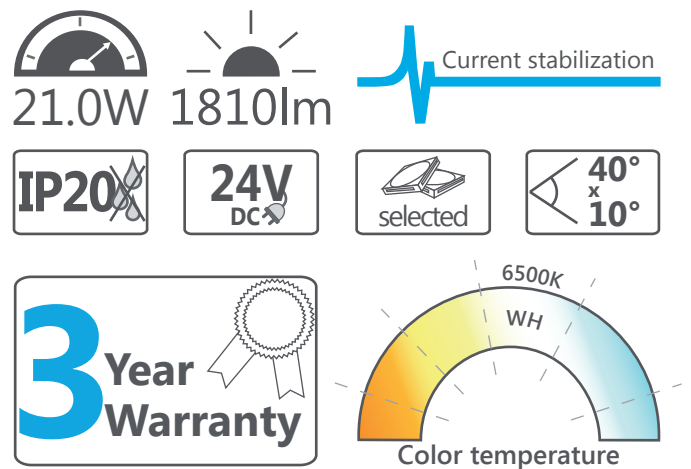

NEW

*best for 5-8 cm*

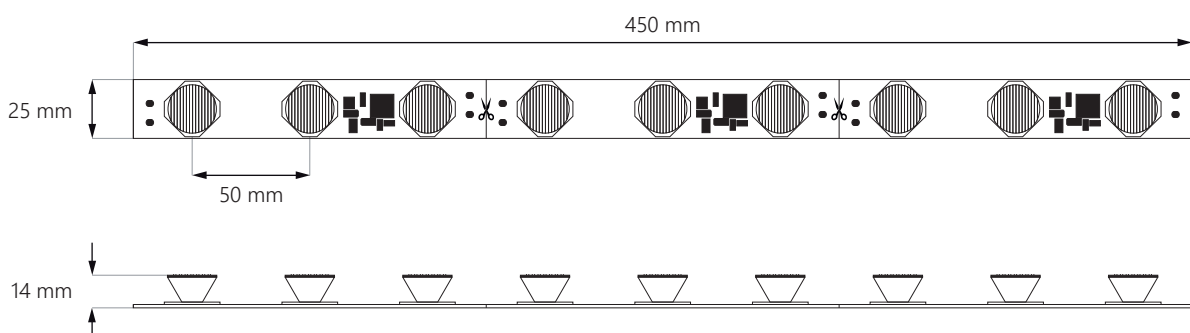

## Features

- binned power SMD diode with high luminous efficiency
- special lens allows the side installation
- stabilizer — ensuring uniform brightness
- aluminum PCB/plate for superb heat dissipation
- chain of 6 pieces (**can be cut every three lenses for the WH module**)
- ESD protection: Contact 4KV, Air 8KV
- auxiliary assembly with **3M** tape

## Application

from 5 cm depth lightboxes, pylons, semaphore boxes, large area advertising (unilateral and bilateral)

# Elypso 1.5W

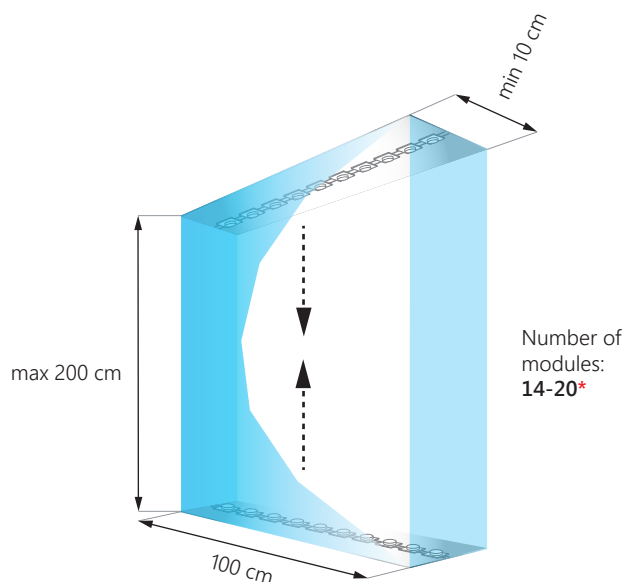

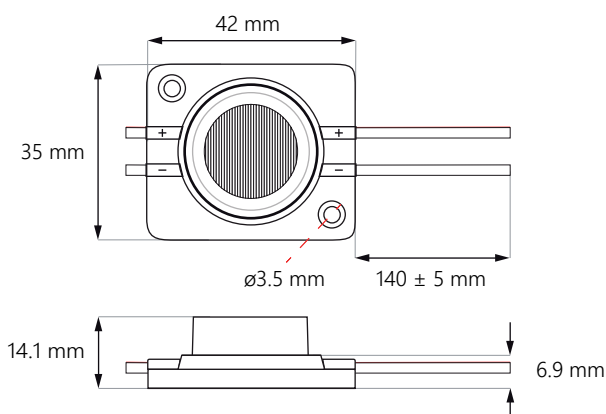

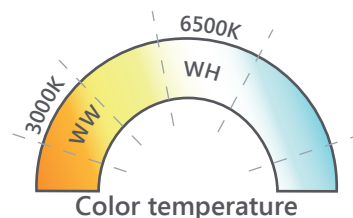

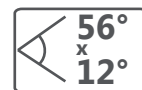

*up to 2 meters edge light*

## Features

- binned power SMD diode with high luminous efficiency
- special lens allows the side installation
- stabilizer — ensuring uniform brightness
- aluminum PCB for superb heat dissipation
- chain of 30 pieces (**can be cut every one piece for the WH module**)
- auxiliary assembly with **3M** tape

## Application

lightboxes, pylons, semaphore boxes, large area advertising (unilateral and bilateral)

\* the exact number of modules depends on the used materials

# Elypso 3.0W

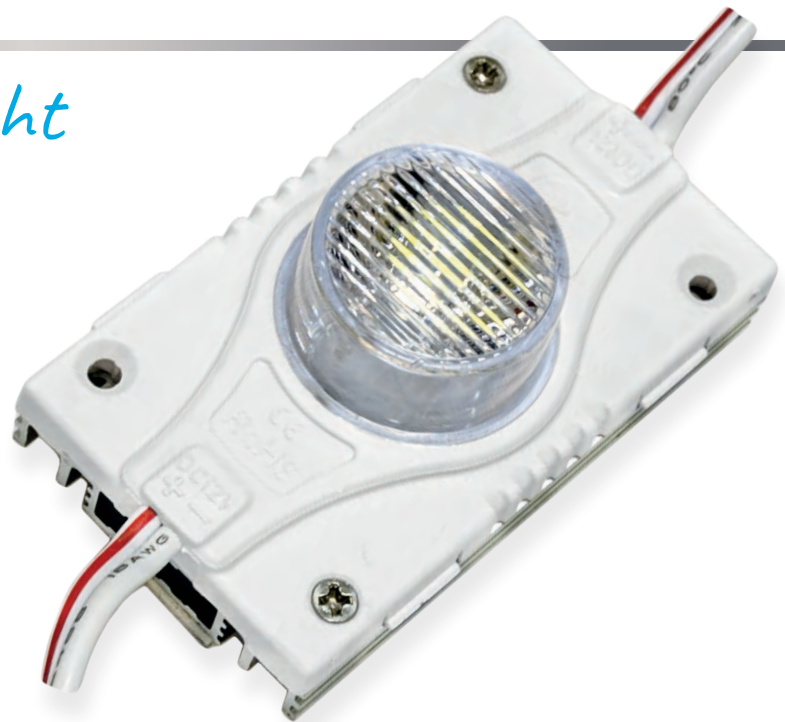

*up to 3,5 meters edge light*

## Features

- binned SMD LED diode with high luminous efficiency
- heatsink provides passive cooling for diode
- special lens allows the side installation
- stabilizer — ensuring uniform brightness
- aluminum PCB for superb heat dissipation
- chain of 20 pieces (**can be cut every single piece**)
- auxiliary assembly with **3M** tape

## Application

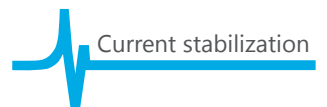

12-25 cm depth light boxes  
(unilateral and bilateral)

## Features

- binned SMD LED diode with high luminous efficiency
- heatsink provides passive cooling for diode
- special lens allows the side installation
- stabilizer — ensuring uniform brightness
- aluminum PCB for superb heat dissipation
- chain of 15 pieces (**can be cut every 3 pcs**)
- auxiliary assembly with **3M** tape

## Application

15-30 cm depth light boxes  
(unilateral and bilateral)

# LED Strips

## PREMIUM

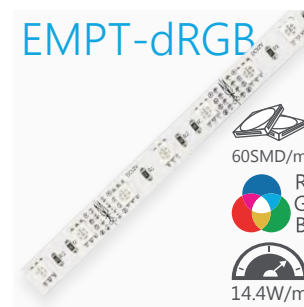

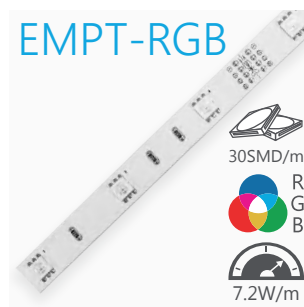

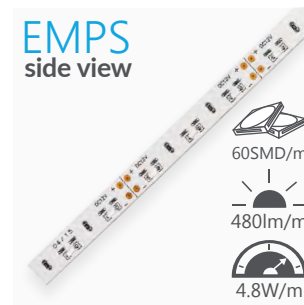

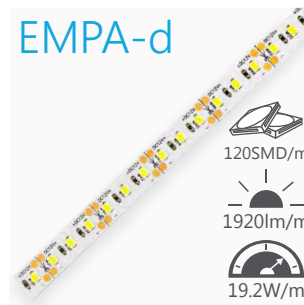

- high class LED diodes  
binned uniform light output
- 24 months warranty
- self-adhesive **3M** tape
- double backing PCB

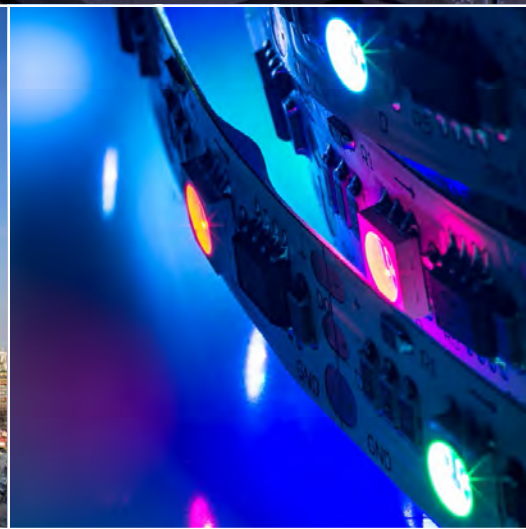

## STANDARD PLUS

- diodes with high luminous efficiency
- 12 months warranty
- self-adhesive **3M** tape
- great value for the price

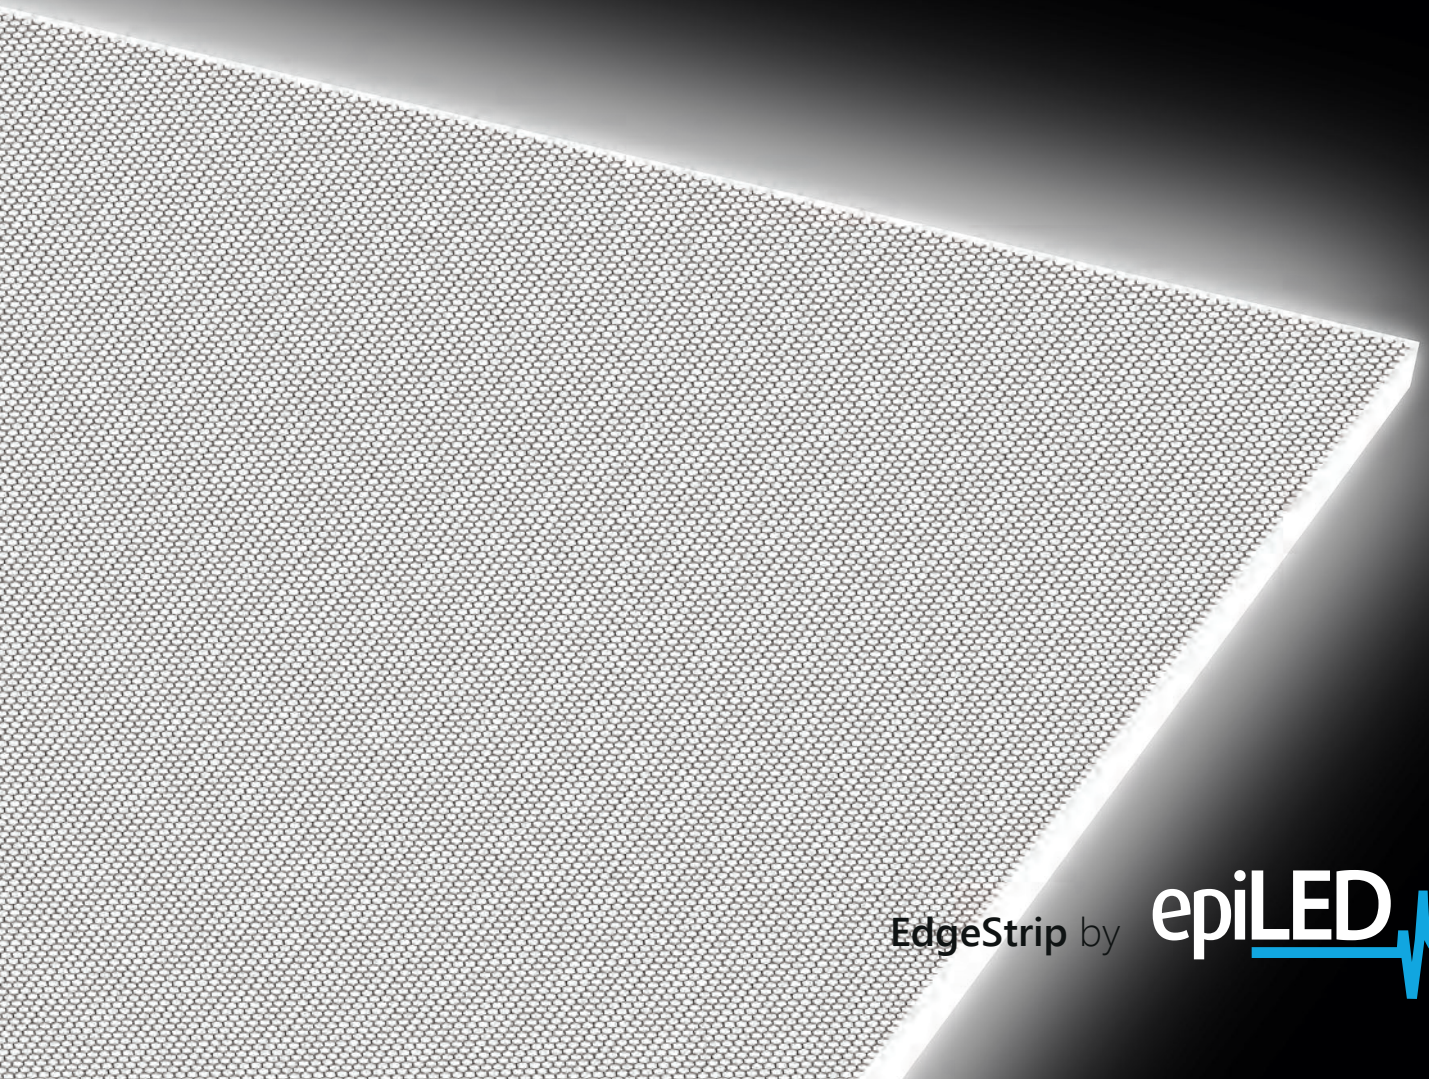

## ECO

- standard diodes
- self-adhesive tape

# Edge lighting for **acrylic glass**

EdgeStrip by **epiLED** 

# EdgeStrip

*slim and powerful*

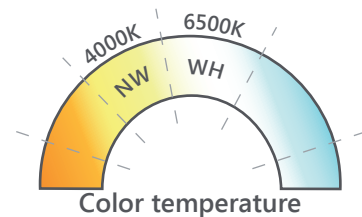

## Features

- selected SMD LEDs
- thick **copper** FPC
- **current stabilizator** in each section
- LEDs density — 120 LEDs / meter
- cuttable every 2.5 cm
- color temperature:  
NW — neutral white (~4000K)  
WH — white (~6500K)
- **heat sink** required for proper work
- auxiliary assembly with tape **3M**

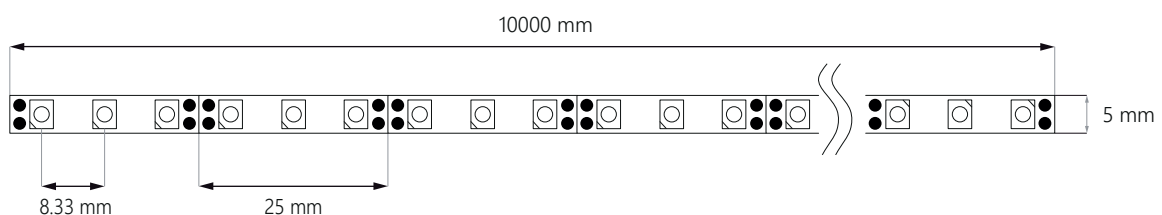

only 5 mm

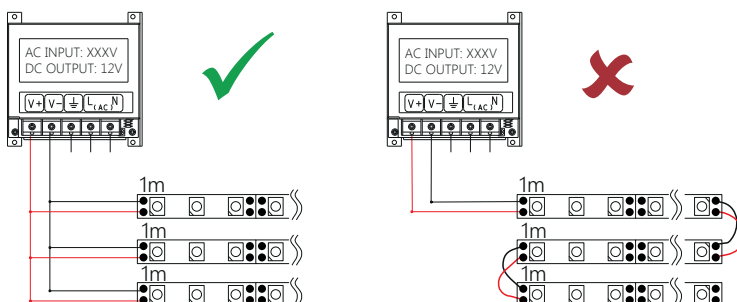

REFOND

## Dimensions

## Installation Instruction

## Important

- LED strip of specialized nature. It requires a special condition of installation and application. **Failure to follow the warnings and instructions could result in damage to product not covered under warranty.**
- maximum power section = **1 m**
- cross section of the heat sink  $\geq 25 \text{ mm}^2$

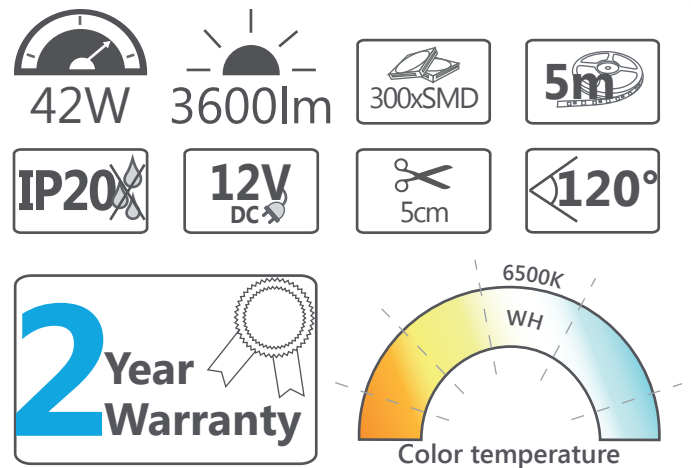

# EMPI-3D

## 3D bendable flexible strip

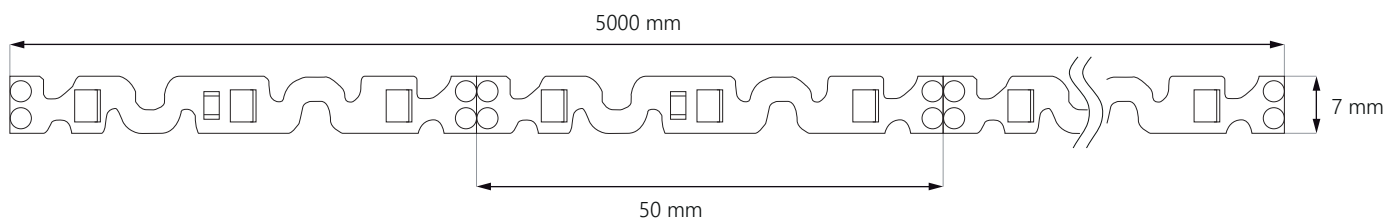

### Features

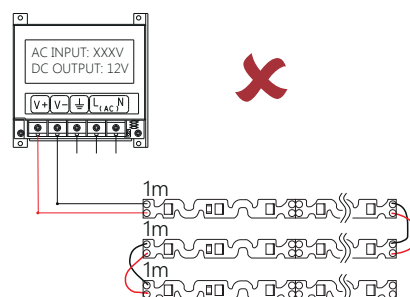

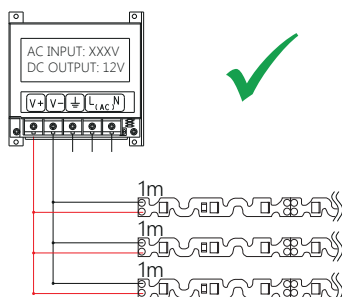

- high class LED diodes by REFOND  
Optoelectronics binned uniform light  
output diodes with high luminous efficiency
- Epistar LED chip
- double backing PCB
- LEDs density — 60 LEDs / meter
- cuttable every 5 cm
- **maximum power section = 1 m**
- color temperature:  
WH — white (~6500K)
- auxiliary assembly with tape **3M**

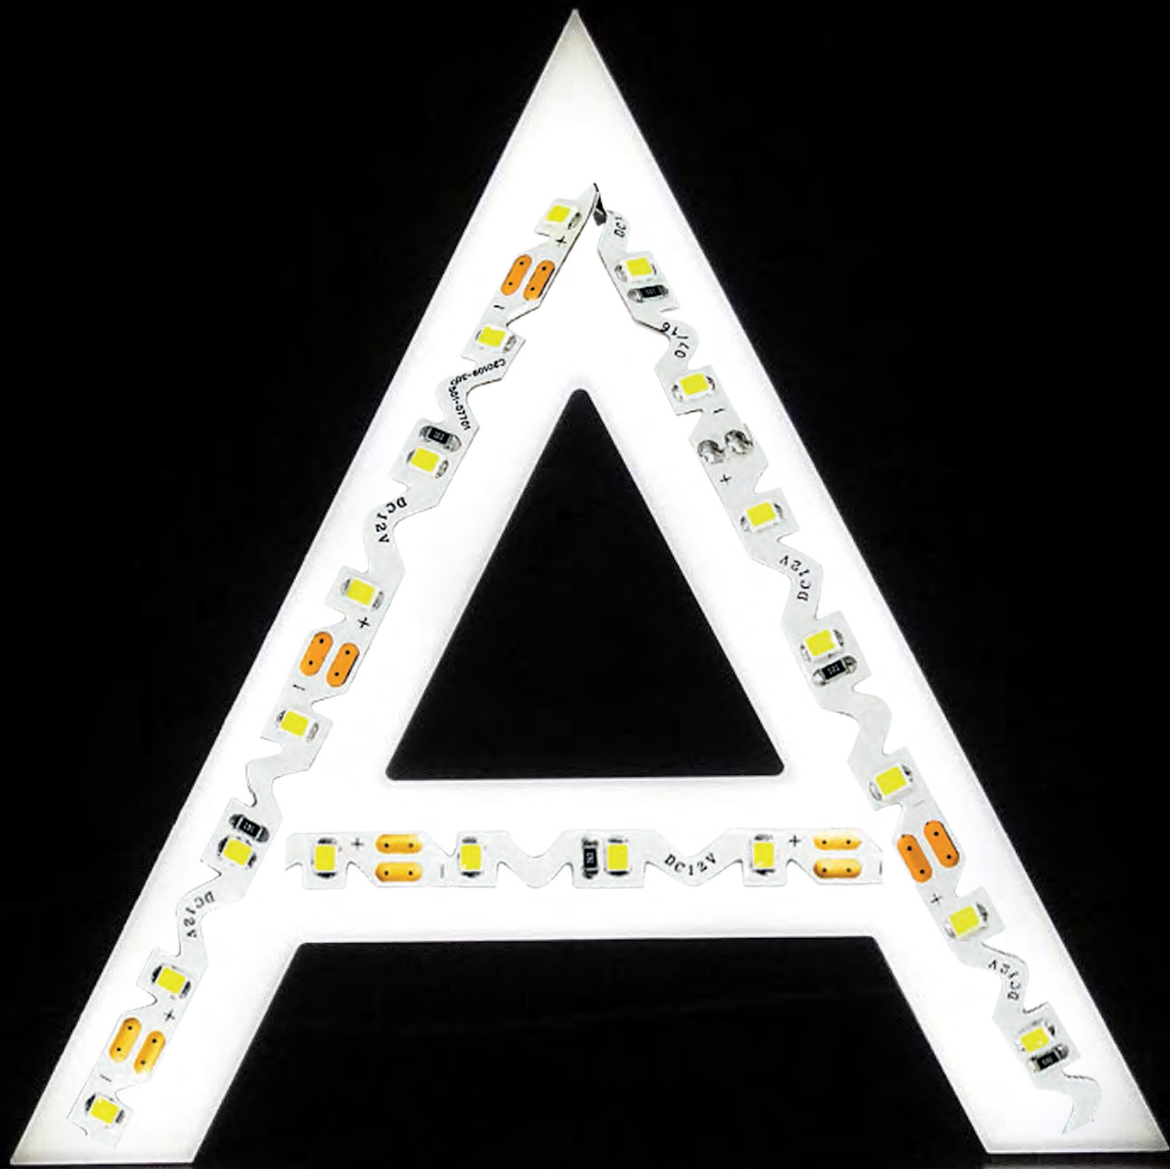

### Dimensions

SET  
ANY  
COLOR  
YOU  
WANT

# epiPIXEL

*set any color you want*

## Features

- superbright SMD top LED — high brightness output, no spot and shadow
- EPISTAR LED chip — good color uniformity, long life and energy saving
- different dynamic effects — gradient, jumping, chasing, scanning and many more
- used in all kinds of plate punching — i.e. electrolytic plate, aluminum-plastic plate, iron plate, stainless steel plate, etc.)
- chain of 50 pieces
- fast & easy installation

## Accessories

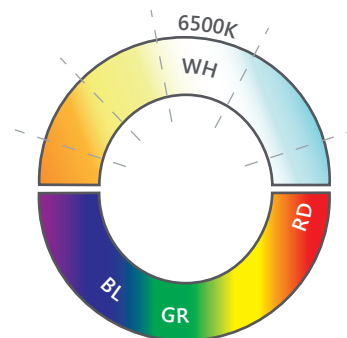

Our offer includes also compatible with the epiPIXEL accessories:

- Power Supplies (Page **38-39**)
- Controllers (Page **36**)

## Application

- decorative lights for events, exhibitions
- outdoor advertising

We are the official distributor of **Mean Well** in Poland.

## LPV/LPH series

- protections: short circuit / over current / over voltage / over temperature\*
- high reliability & low cost
- fully encapsulated with IP67 level
- suitable for LED-based decorative/architectural lighting, LED stage and LED electronic displays
- **3 years warranty**

## LPF series

- protections: short circuit / over current / over voltage / over temperature
- built-in active PFC function
- compliance to worldwide safety regulations for lighting
- fully encapsulated with IP67 level
- suitable for LED lighting and moving sign application
- **5 years warranty**

\* available in LPH series

## LRS series

- protections: short circuit / over current / over voltage / over temperature
- most economical with safety certificates
- AC input range selectable by switch
- ultra compact and 1U low profile
- suitable for industrial applications
- **3 years warranty**

## ELG series

- protections: short circuit / over current / over voltage / over temperature
- optimal price-performance ratio with PFC
- grounded housing
- meet 6kV surge immunity level
- suitable for LED lighting and moving sign application
- compliance to worldwide safety regulations for lighting
- **5 years warranty**

## HLG series

- protections: short circuit / over current / over voltage / over temperature
- high efficiency with PFC
- withstand 5G vibration test
- meet 4kV surge immunity level
- dedicated for harsh environment
- **7 years warranty**

# LED Wizard

## LED Wizard Software

epiLED is the **official partner** of Aries Graphics International, the producer of LED Wizard software. We use and distribute this state of the art software. The customers worldwide obtain the complete estimate for their lightboxes and channel letters. LED Wizard gives the entire industry a clear, standardized path towards developing the best practices.

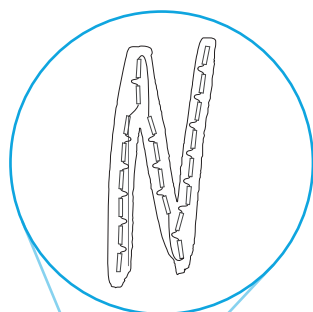

## Official distributor of LED Wizard

Having LED Wizard 7 in house gives you the ability to present more options to your customer, since you can create and submit multiple LED systems in a consistent format. Perhaps you want to provide a choice for your customer in terms of cost/quality, brightness, or warranty. **Contact epiLED** to purchase your own LED Wizard license and start creating accurate and professional looking layouts for your business.

## Complex valuation includes:

- Choosing the appropriate module from the epiLED's offer
- Optimal arrangement of LED modules in light box, channel letter, etc.
- Choosing the appropriate power supply with reserve capacity
- Arrangement of mounting holes
- The cost of materials used in the project

### Auto population for cabinet

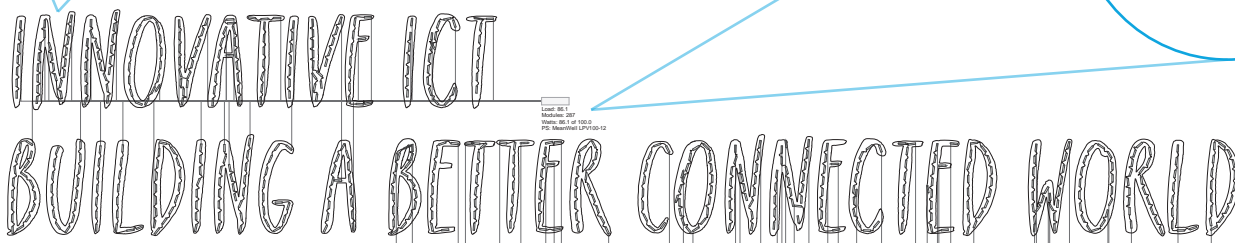

- Hybrid Layout — one inline plus parallel runs
- Parallel layouts — vertical, horizontal, angled
- Any size or shape, not just rectangles

### Loaded & wired power supplies

- User easily selects, positions and loads
- Summary information can be customized
- Multiple ways to load power supplies
